

Team Fatheadz

- These past few weeks our team has been working very hard on finishing up our drawings on Autodesk.
- We have started building our frame and are in the final phases of getting it finished up.
- Our team is looking forward to the building of the front end assembly along with the rest of the car.

Progress...

- Currently we have the majority of our parts in thanks to our sponsors.

- Our instructor, Mr. Neal, is going to pick up our motor and body for us here in weeks to come.

Looking Forward...

fatheadz

- ▶ **After the final bars of the frame are welded, we plan to start working on the front axle and steering.**
- ▶ **Our motor should be here soon so we can start work on our back end and attach our vertical shaft.**

Thanks to our Sponsors..
