

**Team Monster
Update 3
November 7
Hours 3 and 6
Sponsor: Monster Energy**

In these couple of weeks we have finished the front axle and are now working on the front guard that will hold the battery in the front to weigh it down. We have also started making the steering system and the brake and gas pedal mount. In the next few weeks we will be making the rear axle mount as well as starting the design of our seat.

The steering rack also is the mount for our brake and gas pedals.
