

Team Monster
Update #2
October 21
Hours 3 and 6
Sponsor: Monster Energy

We have made a lot of progress on the chasses. We have completed the halo bars and the basic frame of the chasses. We are now modifying the back of the car in AutoCAD to try to have the least possible weight without losing strength. As of now we are making our front axle. We decided to have our axle longer to help keep the car more stable when going into fast turns. Also we have finished in the floor in our car.

Basic chasses with axle almost finished
